

Art

Intent, Implementation and Impact Statement

Art

Vision - At Devonshire Primary School our vision for Art is to give children opportunities to explore, experiment, and have a “never give up” attitude in their artistic endeavours. We also provide the children with the opportunity to explore the works of artists, both past, present and from across diverse cultures. Art is used to support self-esteem, self-confidence and enables children to feel good about themselves. We strive to offer children the opportunities to explore their creativity and to have a sense of belonging through shared artistic experiences.

Intent (What we want to achieve)

At Devonshire Primary School, in Art, we aim for children to appreciate the works of other artists, encourage exploration and experimentation and develop their own voice through their art.

Implementation (How we will do this)

At Devonshire Primary School, children have access to a wide variety of Art resources and have opportunities to explore a range of techniques in art.

Pupils will develop their art skills each year building on their prior knowledge.

Children explore the works of a wide range of artists, both past and present and from diverse cultures.

Children have opportunities to create works of art, showcasing their skills through competitions and displays.

Impact (What the outcomes will be)

At Devonshire Primary School, the Art curriculum will ensure that all children can talk about famous artists and their works and to understand how art reflects the world we live in, both historically and at present.

Art is a form of self-expression and supports self-esteem, self-confidence and enables children to have a voice that makes them feel good about themselves.
