

Week ahead

week beginning 29/6/26

As the weather was so hot, we concentrated on keeping cool!

We had lots of water activities out, all in the shade.

There was some fantastic talking and social skills, maths and reasoning skills and exploration going on.

Our butterflies emerged from their cocoons we set them free on the field.

The children were so engaged in watching the caterpillars grow, pupate and emerge.

Now that the weather has cooled a little, we will return to learning about transport. We will continue with the story of the hundred decker bus.

The children will be playing some transport games, making a giant bus, painting pictures of themselves to ride on our own multi-decked bus. There will be role play bus to drive and ride on too!

We would be grateful for the return of any maths games pieces you may find at home so that we can complete the maths games and the children can start playing them again.

Any questions please come and ask.

Mrs Tickner, Miss Massey, Miss G and Mrs Love.
